

## Table and Chair Arrangements Maintenance Guide

---

All our tables, chairs and décor items are unique creations made-to-measure by our artisans.

Their exceptional quality will make them last for many years.

To preserve these natural materials, a few precautions are necessary.

### Our wood species

---

#### **Solid bleached oak, solid black ash, solid walnut**

Maintenance:

How to clean varnished wood:

- **Dust removal:** Clean the surface regularly with a soft cloth or feather duster to remove particles. Dust can scratch the surface over time.
- **Gentle cleaning:** For regular cleaning, use a cloth slightly dampened with lukewarm water. Avoid using too much water, as prolonged contact with water can damage the varnish.
- **Cleaning products:** If necessary, use a specific product for varnished wood. Be sure to follow the manufacturer's instructions and do not use abrasive products that could damage the varnish.
- **Appropriate drying:** After cleaning, dry the surface immediately with a clean, dry cloth to avoid water marks.
- **Preventive maintenance:** Keep your varnished wood furniture away from sources of excessive humidity and extreme temperature variations.

## Veneers

---

### **Plant-based leather**

Use a cloth slightly dampened with water or a PH-neutral cleaner. Avoid abrasive products.

### **Stone veneer**

All our tabletops are water-repellent (water, grease, oil). Avoid abrasive, toxic products, wax and any type of varnish. Use a sponge and neutral liquid soap.

### **Wood veneer**

Carefully dab stains with a damp cloth and a cleaning product (1% detergent diluted solution). Avoid aggressive stain removers such as acetic acid.

### **Mosaic**

Use a damp sponge or cloth. Avoid abrasive products.

### **Blotting paper**

No special products are required for maintenance. A damp sponge or cloth is all you need. Do not use abrasive products.

### **Porcelain stoneware**

Various types of stains can be treated with an alkaline detergent (drinks, food, ink, etc.).

A solvent is recommended for candle wax or chewing gum.

## Brass Finishings

---

- **Gentle cleaning:**

Use a soft, clean cloth to clean brass.

- **Avoid Abrasive Products:**

Do not use abrasive cleaning products, steel wool or hard-bristled brushes, as they may scratch the surface.

- **Proper drying:**

After cleaning, dry brass thoroughly to avoid water spots or marks.

## Seat cushions

---

### **Plant-based leather**

Use a cloth slightly dampened with water or a PH-neutral cleaner. Avoid abrasive products.

### **Bouclé fabric**

Machine wash at 30°C, air dry and iron gently.

### **Woven fabric**

Machine wash at 40°C and line-dry. Avoid machine spinning cycle and iron gently.
